Consent for Teletherapy

Client Name: _____
(Please print)

Live! LLC can deliver a series of Telehealth programs and services to you. This may include weekly, online therapy via Virtual Portal video-sessions.

Virtual Sessions will be done via our HIPAA Compliant, cloud-based software platform that allows us to meet over the Internet using a video camera and microphone enabled device. We can provide mental health services to anyone with a computer, broadband Internet connection, webcam, and microphone. Online counseling, or “Teletherapy,” is when a professional counselor or psychotherapist talks with a client over the Internet to give emotional support, mental health assessment, goal setting and a treatment plan. This process can be one question or an ongoing conversation. Teletherapy is a viable alternative to therapy in person, especially when medical complications or other circumstances limit a one’s ability to see a therapist in person. Teletherapy is a source of help when traditional psychotherapy is not accessible. It’s effective. It’s confidential. Skilled, licensed, qualified, and ethical professionals conduct your Teletherapy. For some people, it’s the only way they can get help from a professional therapist. Technology basics are required for practitioners who choose to deliver therapeutic services via technology.

By signing below, I consent to the use of Telehealth services to facilitate Teletherapy sessions with Live! LLC.
